SPRING 1909

BULLETIN NO. 2

— AND THIS IS
ANOTHER ONE THAT WILL

DO BUSINESS!

Up-to-Date Record of Surplus, All Sizes
Nice Transplanting Stock
Imported Stocks and Seedlings

CHASE NURSERY COMPANY

HUNTSVILLE, ALABAMA, February 12th, 1909.

TO THE TRADE:

Please note the heavy grade Cherry, Pear and other stock not shown in previous bulletins.

The light grade stock for Transplanting to Nursery Rows is selling fast. We get good orders—and testimonials—from Nurserymen who have tried it before. Please look carefully through this Bulletin and send your Orders Now. Don't Delay. Within two weeks the assortment will be more broken, and before another Bulletin can be issued, we will pack a good deal for Cold Storage Box Lots. Please name a "second choice" where you can, as your "first choice" may be sold.

All stock first-class of grade named, unless otherwise described. Boxing extra, except where noted.

Can ship immediately or hold until Spring, as wanted.

Terms and conditions of sale as shown in Trade List.

Cash with order where purchaser's credit is unknown to us.

Freight prepaid to St. Louis, Rochester or Philadelphia on all Spring shipments.

This Spring our Cold Storage business will be handled from ST. LOUIS, instead of Hannibal.

HIGH GRADE SHEARS

Read What This Michigan Nurseryman Thinks of Them

MICHIGAN, Feb. 4th, 1909.

CHASE NURSERY COMPANY, Huntsville, Ala.

GENTLEMEN:—"Please Express us at once one-half dozen Improved French Shears, also extra spring for the French Shears and one for the German 6 inch Shears.

We almost feel like telegraphing this order. You will remember that about a month ago we ordered a sample pair, to try them.

We have been making Grape Cuttings for several years, and have used the Shears, and thought they were hard to beat. The writer was averaging about 8,000 cuttings per day (of 8 hours) with them, but since getting the French Shears the average has crept up to 11,000 in 8 hours.

We make Grape Cuttings all Winter, and are continually using Shears. We have used nearly every grade of high-class Shears on the market, and yours are the best we have yet tried. To figure in actual cash, we would be one hundred dollars better off had we begun to use these Shears one year ago."

French Pruning Shears—Improved. Have just received a shipment direct from France. They have been improved. The frames are extra heavy, the shoulders more pronounced, giving a better grip. These improved shears are the best all 'round, for nurserymen. For making cuttings we use the 8 inch, but for extra heavy work, cutting back seedlings to the bud, etc., the 9 inch is preferable. We have used this make of shears for eighteen years and our last importation is the best lot we have ever received.

Pruning Shears, German—6 inch, full nickel plaited, volute spring. Used by many for making cuttings. Not large enough for heavy work, but of high grade, beautifully finished and popular.
